

Fixed Skylight

RWF

See the sky and experience natural daylight in your home with a non opening skylight.

The solar control glazing provides 80% heat block for comfort and protection against UV fading of furnishings.

Features

- Non opening skylight
- Bright white interior finish, painted timber frame.
- Weather proof, grey exterior aluminium capping.
- Heat blocking solar control, laminated double glazing as standard.
- Energy efficient glazing and unique thermal collar.
- Flick-fit brackets for easy installation
- Streamlined low profile appearance in the roof.
- Flashing included for tile or corrugated iron.

Solar Blinds

**Powered by
the sun**
free energy

Easy Fitting
no wiring,
no electrician

Controlled
by hand held
remote

Let the
Sun
do the work

Innovative

- After extensive development and testing we are pleased to announce the launch of the NEW Solar powered Keylite Blind.
- This innovative feature puts Keylite right at the forefront of blinds technology and is the simple answer to opening and closing blinds in areas difficult to access.

Free Energy

- The solar blind is controlled with a hand held remote control.
- The solar panel is located in the cassette and collects energy from the sun which then provides a trickle charge to the battery.

Easy Install

- The installation process does not involve wiring or tracking the walls for mains electric, for ease of fitting.
- The battery pack, the motor for powering the blind, and the roller for holding the blind fabric are contained in a cassette secured to the top of the window sash.
